The closest prior art is represented by US-A-6 095 070.
The problem is to design a sewing machine in such a manner that a simple, operationally reliable construction is obtained.

This problem is solved in that the two gear wheels are designed as intermeshing toothed wheels, the output-side one of which is mounted in a web which is held rotatably about the axis of the toothed wheel on the drive side and on which the control lever acts.

None of the known documents (only A documents) has the characterizing features of claim 1.
